

**WE'RE  
HIRING!**

# DESIGN APPROVAL ENGINEER

## Join us and a thriving sector of aviation

We are expanding our Technical Team, working on initial and ongoing aircraft airworthiness. You are a senior level aeronautical engineer and your skills include:

- Assessing Compliance with Design Requirements
- Flight Load and Stress Analysis
- Flight Test Analysis
- Documentation Compliance
- Final Approval of Designs, Modifications and Repairs

You are educated to (minimum) Honours Degree level in Aeronautical, Mechanical or a closely related branch of Engineering.

You are well versed in aircraft design, aerodynamics, structures, loads and stressing, stability and control. Flying experience is an extra bonus.

You will work as part of a team alongside other engineers who have a passion for microlights and light aircraft. Training will be provided.

We offer competitive pay, 28 days holiday (plus public) and the opportunity to mix in the exciting and thriving world of light aviation.

The British Microlight Aircraft Association (BMAA) is based near Banbury; You can find more details about us at [www.bmaa.org](http://www.bmaa.org). We are a friendly and progressive organisation, dedicated to delivering excellent service to our members and to the vibrant British microlighting industry.

If you think this sounds like you, contact BMAA CEO Rob Hughes for more

*The British Microlight Aircraft Association is currently working with some of the most exciting new designs of aircraft in the UK.*
