

High Terrain Flying

EDUCATION MODULE

POINTS

This course is an **EDUCATION** module suitable for

BRONZE

SILVER

GOLD

DIAMOND

HOW TO BOOK

This course can be delivered by BMAA flying schools or BMAA mentors, pilots with recognised experience of flying within high terrain.

COSTS

Costs will depend on provider. This makes an excellent seminar for clubs & flying schools

If combined with the flight practice element, this course can be used as a **FLIGHT SKILL** instead of **EDUCATION** module

OBJECTIVE

To provide safety awareness through ground school training for safer high terrain flying

BACKGROUND

A number of special skills are required to safely fly close to steep or high terrain. Developed as a first step towards a practical mountain flying course, this seminar will provide a good level of advice for those likely to pass over or through high terrain.

SYLLABUS

This course is designed to be delivered by an experienced instructor in around 3 hours. (Ground school element only)

This seminar is split into 4 main topics

1. High Terrain/Mountain weather
2. Technical considerations
3. Human Factors
4. Enroute considerations

Three short videos are included to illustrate examples of flying around high terrain. YouTube video links supporting the presentation content are also included along with flight practice suggestions.

Several AAIB reports for case studies of recent incidents and a list of reference material are also provided.

COMPLETION

Evidence of completion to show for Wings credit will be a certificate of completion or logbook entry signed by an instructor.

Send a copy of your completed Certificate of Attendance or logbook entry to the BMAA Wings scheme for approval and accreditation to your Wings record.
