

Weather: Skew-T

EDUCATION MODULE

POINTS

This course is an **EDUCATION** module for

 **BRONZE**

 **SILVER**

 **GOLD**

 **DIAMOND**

HOW TO BOOK

This course is delivered online and at your own pace.

Book direct at Aviation Weather School

<https://bit.ly/BMAA-SkewT>

COSTS

The online course costs £99 (Feb 2022) for lifetime access and includes a free e-book to allow you to refer back to what you learned plus access to the private Facebook group for support while you learn.

OBJECTIVE

The aim of this online course is to unlock the mysteries of the Skew-T diagram, used in weather forecasting, to assist the pilot in understanding whether any day is likely to be flyable or not.

BACKGROUND

Understanding the weather is one of the great mysteries of flying. With the help of Dr Simon Keeling, you can unlock another piece of the puzzle using the seemingly complex Skew-t which, despite appearances, is in fact very easy to understand.

By the end of the course, it will take seconds for you to assess whether a given day is flyable or not, days in advance.

So, grab a cuppa, settle back and get ready to take your flying to a whole new level!

SYLLABUS

Fifteen video lessons will show you how you can use the skew-t to forecast cloud bases, tops, freezing levels, layers of cloud, rain and snow for any location in the world, days in advance with practical examples and downloadable diagrams to cement your learning. You'll also receive a FREE e-book to refresh what you have learnt.

You will be fully supported throughout the course and beyond with exclusive access to the private Facebook group.

COMPLETION

Please send a copy of your completed Certificate of Attendance to the BMAA Wings scheme for approval

and accreditation to your Wings record.
