

Aviation First Aid

SAFETY MODULE

POINTS

This course is a **SAFETY** module for

- BRONZE
- SILVER
- GOLD
- DIAMOND

HOW TO BOOK

Please check the website for the latest dates.

If there's nothing scheduled, then please contact wings@bmaa.org to register your interest and we'll let you know as soon as new dates become available.

If you'd like to host a course, please let us know so we can put you in contact with the providers and advertise to our membership to help you fill the places.

COSTS

Costs for the course (Feb 2022)
**but subject to change*:*
BMAA Members - £95 (inc vat)
Non-Members - £120 (inc vat)

OBJECTIVE

To introduce pilots to the essential skills in First Aid, both general and aviation specific and to allow them to demonstrate those skills in practice.

BACKGROUND

The skills of basic First Aid are important for the whole population, not just pilots. This course goes beyond the basic First Aid and looks at some of the injuries you may encounter on an airfield or in the hangar

The course has been designed with flying in mind by giving specific examples and scenarios. We have taken topics and applied them to the aviation environment. The course will consider places such as aircraft hangars/workshops (used for inspections, storage, and maintenance) as well as general airfield operations for clubs and flying schools, generally covering all aspects of airfield life and the types of issues that can occur.

Naturally these courses are highly suitable for anyone involved in flying, regardless of what they actually fly. We'd also recommend this to anyone engaged in the business of flying, in particular instructors, school operators, inspectors, and check pilots.

SYLLABUS

You will learn about the following topics, including participating in practical elements:

- Specifics to the aviation environment, with videos looking at airside and airborne scenarios.
- Response levels & observation charts.
- Airway management, including restrictions.
- Resuscitation Adult CPR.
- Dealing with Epilepsy.

- ✈ Differences between heart attack & cardiac arrest.
- ✈ Use of the AED (Automatic External Defibrillator).
- ✈ Dressing of wounds.
- ✈ Correct use of Tourniquets.
- ✈ Haemostatic bandages and powders (for dealing with bleeds).
- ✈ Minor burns and scalds.
- ✈ Anaphylactic shock.

On successful completion of this course, you will gain a recognised qualification in first aid, with a registered certificate. This course is fully certified as a FAA (First Aid Award) Level 3 training course and is valid for three years.

COMPLETION

Please send a copy of your completed Certificate of Attendance to the BMAA Wings scheme for approval and accreditation to your Wings record.
