

Aviation Fire Training

SAFETY MODULE

POINTS

This course is a **SAFETY** module for

 **BRONZE**

 **SILVER**

 **GOLD**

 **DIAMOND**

HOW TO BOOK

Please check the website for the latest dates.

If there's nothing scheduled, then please contact wings@bmaa.org to register your interest and we'll let you know as soon as new dates become available.

If you'd like to host a course, please let us know so we can put you in contact with the providers and advertise to our membership to help you fill the places.

COSTS

Costs for the course (Feb 2022)

**but subject to change*:*

BMAA Members - £80 (inc vat)

Non-Members - £95 (inc vat)

OBJECTIVE

An opportunity to learn about fire safety and gain essential skills for work (or play) around aircraft.

BACKGROUND

Knowledge of Fire Safety is very helpful when operating or being around aircraft. Do you know how to assess a fire, let alone tackle one?

Can you identify different extinguisher types, and would you know which one would be most appropriate to use depending on the circumstances? This course has been put together to teach the skills needed to deal with issues you could encounter in the airfield environment.

Naturally, these courses are highly suitable for anyone involved in flying, regardless of what they fly. We'd also recommend this to anyone engaged in the business of flying, in particular instructors, school operators, inspectors, and check pilots.

SYLLABUS

You will learn about the following topics, including participating in practical elements:

-  How to take a proactive approach to fire safety.
-  Understanding the classes and categories of fire.
-  Understand what actions to take on discovering a fire and raising the alarm.
-  Fire signage meanings and requirements.
-  What escape routes are available and how to evacuate a building effectively.
-  The types and correct use of all current extinguisher and understanding the limitations and safe use of extinguishers.

- 🔗 The use of Marshals and Wardens at private and public events.

The course concludes with practical exercises of 'hot' training, which involves tackling a Class A fire (solids) and Class B fire (liquids) such as fuel or oil using appropriate extinguishers.

On successful completion of this course, you will gain a recognised qualification in fire safety awareness, with a registered certificate. This course is fully certified as a FAA Level 1 training course and is valid for life.

COMPLETION

Please send a copy of your completed Certificate of Attendance to the BMAA Wings scheme for approval and accreditation to your Wings record.
