SERVICE BULLETIN NUMBER 146, issue 1.

TITLE Hang Bolt Lanyard
CLASSIFICATION P&M Aviation have classified this service bulletin essential.
COMPLIANCE Inspection before further flight.
APPLICABILITY Hang bolt lanyard part YQB-31302, batch numbers A9835, A9868, A9880 supplied between 20/6/16 and 05/01/17 for the aircraft types below:

- BM44 Pegasus Quasar 2 TC
- BM46 Pegasus Quantum 15 (Rotax 2-stroke engines)
- BM50 Pegasus Quantum 15-912
- BM56 Pegasus Quantum 15-HKS
- BM66 Pegasus Quik
- BM70 Quik GT450
- BM77 QuikR
- BM80 Quik GTR
- BM81 PulsR

1) INTRODUCTION
A hang bolt lanyard was found to be under-swaged which allowed it to detach at a low load. The lanyard is essential to stop the hang bolt pinch nut from slackening off.

Production procedures have been changed in the factory to prevent this problem recurring.

2) ACTION
The affected batches have the part and batch number written on it.

Contact the factory for a replacement, the original should be returned to the factory.

3) Documentation
The aircraft technical log must be signed “Service bulletin SB146 (hang bolt lanyardcheck) carried out” by a qualified inspector and/or an owner/operator.

4) Continued Airworthiness
At each permit revalidation, the inspector must check that there are no hang bolt lanyards of the affected batches fitted.

**Title:** Hang Bolt plus Lanyard – Inspection / Replacement

**Manufacturer:** P&M Aviation Ltd

**Applicability:** All Microlights of the following types where P & M Aviation Ltd are the Type Approval Holder:

<table>
<thead>
<tr>
<th>TADS No.</th>
<th>Aircraft Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>BM44</td>
<td>Pegasus Quasar 2 TC</td>

**Reason:** The lanyard on a hang bolt plus lanyard component was found to be under swaged which allowed it to detach at a low load. The lanyard is essential to stop the hang bolt pinch nut from slackening off. Should the pinch nut fall off there would not be anything to prevent the hang bolt from potentially migrating out of its housing and the wing would then detach.

This problem was identified as a manufacturing deficiency of part number YQB-31302 and affected three batches of the component: A9835, A9868 and A9880.

**Effective Date:** 21 February 2017
Compliance/Action: Compliance is required as follows, unless previously accomplished:

1. Before further flight, inspect the hang bolt plus lanyard, part number YQB-31302. If the lanyard is from batch number A9835, A9868 or A9880, before further flight, remove the hang bolt plus lanyard from the aircraft and return to P & M Aviation Ltd for replacement. Note: The hang bolt plus lanyard part number and batch number are marked on the sleeve shrunk on to the lanyard.

2. Record the inspection from paragraph 1 and any necessary rectification action in the aircraft technical log in accordance with paragraph 3 of P & M Aviation Ltd Service Bulletin 146.

3. Repeat the actions in paragraphs 1 and 2 at each Permit to Fly revalidation.

ENSURE COMPLIANCE WITH THIS MPD IS RECORDED IN THE AIRCRAFT LOGBOOK
