A. Aircraft information

Aircraft registration G-__ __ __ __  Aircraft type: _________________________________________

Check flight date: __ /__ /20__  Test airfield: _______________

B. Pilot details

Pilot name: __________________________________________

Licence number: __________________ (e.g. UK/NP/123456C/A)

BMAA number: __________ (e.g. 1234)

C. Important information

The check flight must be flown in accordance with, and as described in, the BMAA Check Flying Handbook (TIL 042) available at www.bmaa.org.

If the Permit to Fly’s Certificate of Validity has expired, or been suspended, the check flight must be authorised by a Permit Flight Release Certificate signed by a BMAA Inspector.

D. Airworthiness Declaration

The aircraft has been check flown and assessed in accordance with the latest issue of the BMAA Check Flying Handbook using the attached schedule

The aircraft’s performance has been measured and is normal for type

The engine, fuel system and engine instruments are working properly* □

The handling and stability have been checked and the aircraft flies as intended

The ASI, altimeter and other flight instruments are working properly* □

The aircraft has been stalled and behaves as expected

The stall speed(s) are normal for type □

The aircraft has also been satisfactorily flown at high speed

All the aircraft’s systems have been checked and operate satisfactorily □

All required instruments are serviceable* □

Pilot signature: __________________________________________ Date: __ /__ /20__

*Any unserviceable non-required instruments must be clearly marked ‘US’

E. Check flight schedule

The check flight schedule is on page 2. It must be fully completed and sent to the BMAA together with this page.

Note: ‘SATIS’ is shorthand for ‘satisfactory’.
### 0. Data

<table>
<thead>
<tr>
<th>Registration:</th>
<th>G-</th>
</tr>
</thead>
</table>

#### ASI units (delete as applicable):  
- **mph / knot**  

#### QFE:  
- **hPa**

#### Surface air temperature:  
- **°C**

#### Max All-Up Weight (MAUW):  
- **kg**

#### Actual take-off weight:  
- **kg**
  - (within 20 kg of MAUW)

### 1. Ground run and taxy

**Reference:** Check Flying Handbook para 4.3.1 & 4.3.2.  
**Summary:** Engine ground run to check engine performance and engine handling.

- **Max static RPM:**  
- **rpm**

- **Ground run SATIS:**  
- ✓ ×

### 2. Take off and climb

**Reference:** Check Flying Handbook para 4.3.3.  
**Summary:** Take off using technique and speeds described in Flight Manual / POH. Full power climb at best climb speed, **measuring time to climb 1000 ft** (usually 500’ to 1500’). Calculate and enter climb rate after flight is complete.

- **Take off SATIS:**  
- ✓ ×

- **Best climb speed:**

- **Start height:**  
- **ft**

- **Time to climb (start » start + 1000ft):**  
- **sec**

### 3. Trim and stability

**Reference:** Check Flying Handbook para 4.3.4 & 4.3.5.  
**Summary:** Check trim about all axes, and pitch stability.

- **Pitch trim SATIS:**  
- ✓ ×

- **Roll/yaw trim SATIS:**  
- ✓ ×

- **Pitch stability SATIS:**  
- ✓ ×

### 4. Turns

**Reference:** Check Flying Handbook para 4.3.6.  
**Summary:** Check handling in turns up to, but not exceeding, bank angle limit.

- **Bank angle limit:**  
- ✓ ×

- **LH & RH turns SATIS:**  
- ✓ ×

### 5. Side slips

**Reference:** Check Flying Handbook para 4.3.7.  
**Summary:** Check handling in steady-heading side slips.

- **LH aileron / RH rudder SATIS:**  
- ✓ ×

- **RH aileron / LH rudder SATIS:**  
- ✓ ×

### 6. Stalls

**Reference:** Check Flying Handbook para 4.3.8.  
**Summary:** Check stall speed(s), behaviour and recovery. Decelerate to stall at 1 knot (or mph) per second, with engine at idle.

- **Stall speed (flaps up):**

### 7. Instruments and systems

**Reference:** Check Flying Handbook para 4.3.9.  
**Summary:** Check instruments and systems.

- **ASI & Altimeter SATIS:**  
- ✓ ×

- **Other flight instruments SATIS:**  
- ✓ × NA

- **Engine instruments SATIS:**  
- ✓ ×

- **Flaps SATIS:**  
- ✓ × NA

- **Other systems SATIS:**  
- ✓ × NA

### 8. High speed flight

**Reference:** Check Flying Handbook para 4.3.10.  
**Summary:** Check behaviour at speeds up to, but not exceeding, **V_{NE}**. Use IAS for **V_{NE}** and speed achieved.

- **V_{NE}:**

- **Maximum speed achieved:**  
  - (normally within 5 mph / 5 knots of **V_{NE}**)  

- **High speed flight SATIS:**  
- ✓ ×

### 9. Approach and landing

**Reference:** Check Flying Handbook para 4.3.11.  
**Summary:** Land using technique and speeds described in Flight Manual / POH.

- **Approach and landing SATIS:**  
- ✓ ×

---

**BMAA/AW/011 issue 7a (April 2018)**

3-axis control aircraft
The BMAA’s Check Flying Handbook (BMAA TIL 042) provides guidance on check flying BMAA aircraft. The Check Flying Handbook is available on the BMAA’s website [www.bmaa.org](http://www.bmaa.org). It is vital that pilots read, understand and remember the contents of the Check Flying Handbook prior to flying a check flight.

The Check Flying Handbook contains a checklist to assist a pilot prepare for flying an Airworthiness Check Flight. This checklist is also provided here as an aide memoire. The items in the checklist are described in detail in the Check Flying Handbook.
